FINANCIAL AND COMMERCIAL. MONEY MARKET.

THURSDAY, Jan. 18 ... S P. W. There was a favorable surn in the book in-to-day. At the first board there was a general im-provement, and more activity than we have noticed for some days. Virginia 6's advanced | per cent; There was a favorable turn in the stock market Canton Company, 4; Cumberland, 14. Alcaragua Transit, 4; New York Central Railread, 4; N. Indiana Railroad, 1; Harlem, j; Érie Railroad, 1; Reading Railroad, 1; Hadsou River Railroad, 1; Hinosou River Railroad, 2; Hinosou Central Railroad, 2; There was a very spirited movement in Cumberland Coal stock this morning. All the leading fancies were in demand, and make the stock that th and we should not be surprised to see a pretty gene-ral infision. The easier state of the money market, the absence of any unfavorable intelligence from Europe, the limited extent of foreign importations. and the accumulation of specie in the vaults of our banks, all tend to give a greater impetus to the exansion of prices for stock securities, and to give a better opportunity for outsiders to realize. These prices must bring into the street a great many shares of stock which have been held outside for investment. A further advance would bring about a more extensive realization, and increase the load for the brokers to carry. The banks continue to loan freely on call, and customers are pienty snough among stock speculators. Until the future clearer to the vision of bank managers, they will not lock up their available means in paper of long Mates. Although this encourages speculation in That y stocks, it serves materially to check the ex-pansion of commercial credit, and restrict all the operations of trade. The increase of discounts to importers and others engaged in trade, would be wery likely to increase our importations, and run exhange up again to specie ahi ping points, when a centraction similar to that recently experience would have to be again resorted to. With all the Her during the past six months, they would launch but immediately and extend their business to the full limit of the facilities provided, and it is there ore necessary that the screws should be kept hightened for a time longer, that the country may become able to bear the reaction, and gain strength enough to enter again into active tion. The accumulation of gold in our banks gives them greater dead weight to carry than they desire, and some outlet must be found for the employment of so much inactive capital. Loans to brokers on call may do well enough for a time, if sarried only to a moderate extent, but if loans were made to capitalists and builders, for the purpose of enabling them to enter largely into the improve-ment of city property, in the erection of dwelling bonces, and such buildings as are actually required by the mass of population on this island, it would be vast service just now in giving employment to ousands of workmen, would make a large amount raf property productive, and tend much to the rerecurity, it could not be questioned. Capital used this way would not aid in the expansion of our foreign trade, or give an undue impetus to specula-

Bimson Draper's regular semi-weekly auction sale f stocks will take place at the Merchants' Exc. ange c-merrow, (Fridey,) at 12h o'clock. Among the securities to be offered are a number of shares representing the Mahoney and Shamokin Coal pro

perty.

At the second Board the market opened and closed with an upward tendency. Indiana 5's advanced à per cent; Virginia 6's, à; Harlem 1st Binds, 1; Canton Co., 1; Nicaragua Transit, 1;

The Peter Cooper Fire Insurance Company have placet a dividend of seven per cent; the Rutgers Fire Insurance, four per cent; the Corn Ex sarge Bank three and a half per cent.

It is our impression that Mr. David Hoadley is the ensignee or agent of Mesers Page, Bason & Co., and ot the assignee. He receives their remittances or Shipments of gold made to New York from San Fran-sisco, and pays all drafts drawn sgainst it. We are not aware that Page, Bacon & Co. have made an assignment for the benefit of their creditors. If they cave, it is the duty of the assignee to retain possession of their assets, and pay their creditors pro rata, and not pay any demand in full until it is shown that

ail can be paid. The transactions at the Assistant Tre effice to-day were as follows:—

Of the amount received to-day \$100,000 was nater draft.

The announcement of the suspension of Page & Bacon in St. Louis, created quite a panic, and a on apon most of the public and private banking houses in that city. Only one new failure was re-ported in the papers of that day—Messrs. Loker, Renick & Co. About a dozen of the realtment and most minent citizens of St. Louis published a card on preminent citizens of St. Louis published a card on the 16th inst., in which they pledged themselves to metain the leading banking houses, and made themelves responsible for deposits with the houses named. We give at some length, in another part of shie day's paper, extracts from S'. Louis papers, reative to the excitement in that city. We have no neubt a few days will suffice to allay the paste, and partially restore publi: confidence. From all parts of the country telegraphi: despatches report numerous heavy failures. The uspension of houses of such magnitude, engaged in active business ope stions, must materially weaken the little confidence left, and protract the revulsion to an indedcite period. The restoration of a sound and bealthy state of things can only be brought about by such an ordeal as we are now passing through. It will be necessary to separate the wheat from the chaff, to separate the wesk and diseased from the strong and healthy, before we can expect better times. We cannot patch up matters and work along under insolvency and rottenness, as in times of confidence, when credit covers bankru ,tcy and hides it from the public eye. The time of trial has come and all who cannot stand the most search ing investigation must succumb. Confidence nas falsen to such a low point that it cannot sustain those who have not the means to sustain themselves. These fat ures purify the atmosphere of the figagoial and commercial world, and the storm has not passed over yet. We tear many more failures must yet occur before settled and permanent case will be re-alized. New York has not yet had its share. The immense losses on all the public loans for States, with s, counties, towns, railroads, &c., negotiated in this city, have fallen with crushing effect upon private banking houses, and it is the general impression that the end is not yet—that there are a number of patched up concerns left, which must sooner or later collapse.

The Supreme Court has appointed the United

States Trust Company receiver for the Knicker-becker Bank, and John L. Mason, Esq., referee.

commended as a law to the Legislature in his last means, and we have no doubt the system will ultimes, be very generally adopted. It would be the cost effective way of putting a stop to the wild at banking, and would do more towards preserving a uniform and redeemable currency than all the legislation we have ever yet had. Pennsylvania, litaryland, Virginia, Louidana, Missouri, Arkansas and District of Columbia prohibit the issue and circulation of small bills, and we hope soon to add several other States to the list. Indiana, Illinois and Michigan require such a law more than any others Michigan require such a law more than any others in the Wessern section, to shut out that class of inanciers who have found within their limits such a

fine field for their operations.

The State of North Carolina is in the market for another loan. The Treasurer is desirous of selling three hundred and seventy bonds, of one thousand dollars each. They will bear date the let of January, 1855, and will have coupons attached for the interest at six per cent per annum, payable the first days of principal will be payable at the Bank of the Repub-lic in the city of New York, unless where the purchaser prefers to have them payable at the treasury of North Carolina. Proposals will also be received at the same time for the purchase of eighty thousand dollars in bonds, running ten years, issued by the same authority, for the construction of the Weldon and Gaston Railroad, and the improvement of the navigation of the Nonse and Tar rivers.

The bil authorizing a subscription by the State of North Carolina of eight hundred thousand dollars to the railroad from Goldsboro, via Newbern, to Beaufort Harbor, passed the lower house of the Le gislature by a vote of 91 to 14. There is no doubt but that it will pass the Senate. The Rip Van Winkle State appears to be waking up to the portance of an extensive system of internal improve.

ments.
The contract for the construction of the New York and Boston Air Line Railroad, via Woonsocket, has recently passed out of the hards of A. C. Morton & Co. into those of John M. Wood, of Portland, Me., and the transfer has been can tioned by the Board of Directors. By this arrangement Mr. Wood assumes all the responsibilities of Messrs Morton & Co., and also becomes a subs riber for 1 000 shares of the stock in addition to the large amount of stock which he is to take under the provisions of the contract. The di ectors announce that they expect to complete the road between M.d. dictown and New Haven within one year, and to Beston within two or three years.

The gross income of the Connecticut River Railroad Company for the year ending November 30th last, was \$277,770 71\(\frac{1}{2}\), of whi h \$135,960 was from passengers, and \$130,508 from freight. The total expenditures were \$190 946 75, leaving the net income for the year \$86,823 96. The expense of operating the road was \$135,487 11; the rent of the Asbuelot road was \$30,900. The total number of passengers on ried during the year was 349,925 number of tons of freight carried, 102 850, both of which show an increase over the previous year. The operating expenses without charge for the use the operating expenses—wishout charge for the de-of freight cars—and rent of the Ashuelot road for the year, are \$44.447.62; the receipts and benefits from it, \$21.606.94—belog a loss of \$22,840.68. The report says that while the increase in the "gress earnings" the past year has been \$19,549.812, the excess of extenses has left bu; about the same "set income" as in 1853.

The annexed statement exhibits the capital sto k, funced and floating debt of the Michigas Central Railroad Company, with the items of expenditure, &c .:-

ton street, Brooklyn; Zolber, 44 South Third street, Philadelphin.

Mi ORTANT TO QUARRYMEN, STONE CUTTERS, architects and builders. PORTEWR Patent Spring Hammer Stone-dressing Machine is the first completely successful attempt to secure by means of machinery, the cutting of every kind of building stone with rapidity and precision, giving the most perfect finish to plain surfaces, frents of steps, straight and curvelinear mouldings, finted columns, &c. The principle of this simple, compact and durable machine, is precisely that of the madet and chasel used by nand in the most skillful manner, securing a perfection of line truly admiral, and with a rapidity that leaves the old belious processes of hand labor enturely in the shade. One of the machines can be daily seen in operation at 35 Gannewort street, are the Nush river, by Tweitin street.

Machines cutting surfaces from two to fix feet wide, employing three mea, and driven by a two-horse power sugne, at a total creat of not ever \$5 per day, will readily and perfectly perform the labor of from \$5 to 100 mm, thus insuring a reluction of about one third in the 50st of all kinds or building stone.

Magnits for the use of this machine in this, the United States, and foreign countries, are now for sale by the proprietors, Mesers, Capwell & Perfer No. 37 Wall street, Jannesy court.

Quarrymen, atone cutters, builders, contractors, and the public generally, are invited to examine this novel and concentral machine.

and concentral mactine.
